R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can make a table like this:

VERB	URI
GET	/something/fake_banners(.:format)
POST	/something/fake_banners(.:format)
GET	/something/fake_banners/new(.:format)

Some stuff.
